Each year the Institute for Research in Schools holds a symposium. This is an opportunity for schools to share the work they have been doing with the detector either through delivering a talk or submitting a poster. These guidance notes accompany a template poster that you can use as a basis to communicate your work.

For each of the following headings include up to 200 words. Please note that when printed the poster is A2 size.

1. Summary
   This should be an overview of the project and its results.

2. Research Aims
   In a few bullet points summarise what you were trying to find out.

3. Background Information
   In this section include any information that is required to

4. Experimental Method
   Provide details of how you designed your experiment and the steps you took when gathering results. The description given should allow others to repeat your experiment.

5. Results
   Summarise your results. This can be in the form of tables, charts or graphs.

6. Analysis and Conclusions
   This is an opportunity to re-visit your research aims based on your results. Did you meet your aims? Are there opportunities for further investigation.

On a separate blank A4 piece of paper please include a list of references used.
